

Bulgarian Business Forums

A collaboration of BBF and the cluster of Education C-Edu Cluj to implement the CIEF program on local level in Bulgaria.

CIEF is a product of new ways to actively listen to young people, to include them into decision making and to support their experiments of potentially disruptive solutions to societal problems and/or to our city and community needs. CIEF includes a Think Tank on Dynamic Development of New Learning (TTDD4NL), a Nutshell (documenting the process and follow-up the change process) and an Incubation program - called FIX, that supports teams of young people (16-26 years old) to test and incubate their startup ideas on innovative and socially innovative solutions.
