

# Development of best practices on business acceleration services for intermediary organizations

## Geographical distribution

### EurA AG Group

Support the creation and further development of regional innovation valleys through a series of projects and activities developed by EurA AG Group – namely through our local support to startups and SMEs in 11 regions in Germany, and 5 countries in Europe (Germany, Portugal, Belgium, Bulgaria, Italy) as well as through projects such as the ACCELERO project – funded by Horizon Europe – Scaling up acceleration services in Europe that aims to contribute to reducing the unbalanced business activity in Europe. The project will support 10 intermediary organizations in emerging and moderate innovation regions in Europe to exchange best practices and co-create high-level business support services to their local SMEs aiming to retain them and enhance their regional innovation ecosystem.

## Description

## Deliverables and milestones

Based on ongoing discussions, EurA would be able to contribute/provide, i.e., in depth analysis of the needs of different emerging and moderate regions in Europe from the perspective of the different stakeholders, co-creation activities with leaders and strong innovators, encourage and support the participation of local actors in European platforms and schemes that can leverage on their local actions, among others.
