ReACT, a platform allowing a seamless customer and business experience for a real end-to-end, sustainable, and global Logistics

Geographical distribution

ReLOG3P

Description

ReLOG3P developed ReACT (ReAccompanying Chain Transformation), the first and only "one-stop-shop" platform allowing a seamless Customer and Business experience for a real end-to-end, Sustainable, Global Logistics designed on the basis of the principles of "Ethical & Sustainable Logistics" and "Security & Privacy by Design", where Sustainability is approached as a concrete rebalancing between social, environmental and economic interests (People, Planet, Prosperity).

Big focus on two tools of the platform:

- **Wiki-Logi**: a knowledge database for the searching, locating, sharing of ideas, information, knowledge, specialized and specifically designed just for the Global Logistics Ecosystem to contribute to the achievement of the UN SDGs

- **Academy**: consolidates and offer online learning solutions with the aim to allow the Logistics' workforce to fight its obsolescence, increase knowledge and value for people and businesses. A specific eye is given to the upskilling, reskilling and lifelong learning tools relating innovations and Sustainability

Deliverables and milestones

Availability of our expertise and tools to support NEIA.
