

University of Vaasa

Talent Boost is a cross-administrative programme designed to attract and retain international talent, and to help with immigration. It aims to make Finland better known and more attractive to international talent. Other aims include harnessing the expertise of international specialists already residing in Finland to support the growth, internationalisation and innovation activities of Finnish companies. The programme strives to make the Finnish labour market more open and attractive to international talent. Talent Boost is a national collaboration platform for the development of talent-related services. Sustainability, innovation and entrepreneurial training activities across Europe.
