

The Institute for Infrastructure Environment and Innovation (IMIEU)

IMIEU will collaborate together with startup ecosystems in deep tech innovation areas to deliver transformative solutions in the face of global challenges, contributing to energy security and selfdependency of Europe regarding critical materials, in line with the Paris Agreement:

Equity and Grant search

Bi-lateral search with non-EU funds, multi-lateral funds if outside of EU market ambitions

Consortium development – building a consortium, if necessary, partner search

Coaching for pitch, data room improvement

Help in negotiations for contracting, legal advice, on IP Protection, but also on permitting and certification for (upscaled) installations.

Flagships

Budget/Financing

10.000.000 - 80.000.000€

Public **Private** **Grant** **Other**

Description

Deliverables and milestones

- Improving financial resilience due to rises of prices in resources, energy costs and inflation
- Diversifying the financial basis
- Funding upscaling and going higher up in the TRL Level; establishing reliable supply chain for upscaling
- Innovative applications in the field of drone technology and innovative renewables
- Notifying of opportunities and synergies in the new Horizon Programmes 2023-2024 and 2024-2027
- Aiding in consortium building
- Reducing investment risks
- Providing help in the certification and permitting process for LTA drones as well as applications utilising the synergy between electricity production by salinity gradient power generation and harvesting of magnesium and lithium from industrial brine
